EXPERIENCE

Dbiz AI Solutions (AU Client)

Senior Software Engineer

Remote – Mumbai, IN

Mar 2023 – Present

- Awarded Rising Star (August 2025), for handling Principal Engineer responsibilities for 15 months, which recognized one early-career engineer across the organization per half-year for exceptional adaptability, technical impact, and cross-functional leadership.
- Drove a design system upgrade across 8 teams, boosting report pagination speed by 99.5% in Selling team's module, enabling seamless navigation through 1M+ records.
- Led a major Angular upgrade in a microfrontend architecture, from version 11 to 17, reducing build times by 71%, significantly improving developer productivity and deployment speed.
- Migrated content management system from Kentico to Payload CMS using Next.js, improving Google Lighthouse scores by 156% (performance), 68% (accessibility), and 59% (best practices).
- Resolved 29+ ServiceNow incidents including a P2 token refresh bug impacting session expiry and a P3 JavaScript type coercion bug affecting scientific notation parsing of asset numbers across 11 single page applications.
- Led refactoring of all authentication scenarios for the single-spa application shell, consolidating security logic, improving maintainability across 11 single page applications, and ensuring seamless performance for 4000+ users.
- Implemented a Proof of Concept for Sales team to manage tasks offline on iPad by converting Angular application to a Progressive Web Application using @angular/pwa library.

Ericsson Inc.

Software Developer

Plano, TX

Sep 2021 – Mar 2023

- Added Internationalization and Localization to Angular application using ngx-translate library.
- Created unit tests for 25% of the codebase's Angular components using TypeScript, Karma, and Jasmine.
- Led UI/UX for a new product release by working closely with stakeholders to design wireframes in InVision Studio.

Santa Clara Laptop Orchestra (SCLOrk)

Computer Musician, Engineering Intern, Teaching Assistant

Santa Clara, CA

Jan 2018 – Aug 2021

- Built a Graphical User Interface in SuperCollider and C++ to enable mirror functionality for QuNeo.
- Designed and developed an official website for SCLOrk in HTML, CSS, and JavaScript.
- Recruited out of orchestra as a Teaching Assistant, a position not open to undergraduate applications.
- 1 of 4 students chosen to be in Dr. Bruno Ruviano's pilot program to perform off-campus in a chamber ensemble.

Santa Clara University

Computer Science Teaching Assistant

Santa Clara, CA

Jan 2018 – Mar 2020

- Recruited as a Teaching Assistant, a position not open to undergraduate applications, by Dr. Natalie Linnell.
- Taught fundamental programming concepts and helped debug 15 students' C++ code every lab session.
